

BIOGEOMETRY FOUNDATION TRAINING with DOREYA KARIM - GENEVA 2018

We are pleased to announce a new [BioGeometry Foundation Training in Geneva with Doreya Karim, May 3rd - 8th, 2018.](#) It will be followed by [BioGeometry Advanced Training from May 10th - 15th.](#)

Register Now!

Early Bird Price until Wednesday, February 28th, 2018.

A six-day course from Thursday, 3rd to Tuesday, 8th of May (level 1, 2 and 3). The course starts at 10am until 5pm with one hour of lunch break.

LOCATION

[John Knox Center - 27, chemin des Crets-de-Pregny - 1218 Grand-Saconnex \(Geneva\)](#)

COST

Regular Price: CHF 1'300

Early Bird Price: CHF 1'100 for all reservations confirmed before Wednesday, February 28th, 2018.

Required Training Tools : CHF 120 (Horizontal and Vertical Pendulum Set, BG16, Neutral Pendulum)

Required Training Book : CHF 20 (BioGeometry Back to the Future)

REPEAT STUDENTS

Please use the code: FTRPT to claim your 50% discount (CHF 650). Please bring your Foundation level tools to class.

The 3 level BioGeometry Foundation Training includes the first 3 levels of the BioGeometryPersonal Development Curriculum and is a pre-requisite for the BioGeometry Advanced Training and Home Practitioner Licensing Track.

Referred to as Nature's own design language, BioGeometry uses the unique energy quality found at the center of all energetic systems to achieve harmony on all levels of human and environmental energy quality. BioGeometry revives Ancient Wisdom through a modern alchemy of shape and energy. Today, medicine and most forms of Holistic Medicine are based on a paradigm that either activates or sedates the energy system, without truly achieving a harmonious balance. Founded by Egyptian architect and scientist, Dr. Ibrahim Karim, BioGeometry's breakthrough research identified the specific energy codes that are found naturally in power spots on the earth. The natural function of this energy effect is to provide balance, or "centering," to the different energy-qualities or effects within any living system. By replicating and amplifying this energy quality, you will in essence, create an anchor that will hold all the energy qualities around it in perfect harmony. BioGeometry takes us beyond our quantitative worldview, reviving the qualitative worldview of the Ancients.

Is it possible that the concepts behind Ancient knowledge can come alive in a modern science, to help solve the negative effects being faced from technology today? In the Foundation training, we will not only explore this question, but also actually apply these principles to daily life for an effect. One of the main tenants of BioGeometry is that subtle energy can be used for practical purposes. In the foundation training you will learn to measure and work with all the different variables, which affect energy systems, including shape, motion, sound, and colour, moving from the micro to the macro levels of the inner and outer environment. You will learn the laws of how subtle energy works, which are universal across all fields. Today, BioGeometry energy-quality balancing solutions are being applied to architecture, telecom networks, industrial design, and vehicles to transmute the effects of environmental energy disturbances from sources such as electromagnetic radiation, structural design, and earth-energy radiation. BioGeometry is also being applied in agriculture and animal farming to increase productivity while reducing the use of controversial chemicals and artificial treatments.

Specific Goals of the training:

1. Detect, create, and amplify beneficial energies.
2. Detect and harmonize harmful energies, including those from electromagnetic fields, chemicals, geopathic stress, and food and drink.
3. Unlock and understand nature's own design language at the archetypal level of the universe.
4. Practically apply the Ancient worldview of a qualitative universe in a modern science to solve problems faced in our daily life.
5. Learn the universal laws of energy that can be applied to any field from medicine, to agriculture, to design.
6. Tune into your own personal wavelength to be able to measure the resonant effects of any object or energy system on yourself.
7. Measure and balance the energy pathways of the body's organs using BioSignatures.

Looking forward to a great week together!

With gratitude,
Graziella Zanoletti
